PROJECT REVIEW : MILESTONE PROJECT – 1

Date: 26-03-2026

Dynamic Online Examination & Result Processing System

SDG: SDG No – SDG 4- Quality Education

Presented By:

A.ASHWIN HARATEJA – VTU26093 – Reg.No:23UECS0667

Courses Handling Faculty:

Dr. Hafizur Rahman- B.E., M.Tech., Ph.D.

INTRODUCTION

The picture can't be displayed.

1

- Online examinations are becoming an important part of modern education systems.
- Traditional paper-based exams require more time, manual effort, and resources.
- Managing exams, evaluating answers, and publishing results manually can lead to delays and errors.
- The **Dynamic Online Examination & Result Processing System** provides a digital solution for conducting exams online.
- This system allows students to register, login, and take exams through a web application.
- The system automatically evaluates answers and generates results instantly.
- It helps institutions manage exams efficiently with less manual work.
- This project demonstrates how web technologies can simplify and automate examination processes.

PROBLEM STATEMENT

1

- Traditional examination systems depend mainly on paper-based tests and manual evaluation.

2

- Managing exam papers, checking answers, and calculating results requires significant time and effort.

3

- Manual result processing may lead to human errors and delays in publishing results.

4

5

- It is difficult for institutions to conduct frequent assessments efficiently using traditional methods.

6

7

- Students also have limited flexibility in accessing exams and results quickly.

8

- There is a need for a system that can automate the examination and evaluation process.

9

- A web-based solution can simplify exam management and improve accuracy.
- Therefore, the **Dynamic Online Examination & Result Processing System** is developed to address these issues.

OBJECTIVE(S)

The picture can't be displayed.

1

2

3

4

5

6

7

8

9

- To design and develop a Dynamic Online Examination & Result Processing System for conducting exams online.
- To provide a secure registration and login system for students to access the examination platform.
- To implement an online examination interface where students can attempt multiple-choice questions.
- To automate the evaluation process and generate results instantly after exam completion.
- To store exam records and result history in a database for future reference and analysis.

PROPOSED SYSTEM

The picture can't be displayed.

1

2

3

4

5

6

7

8

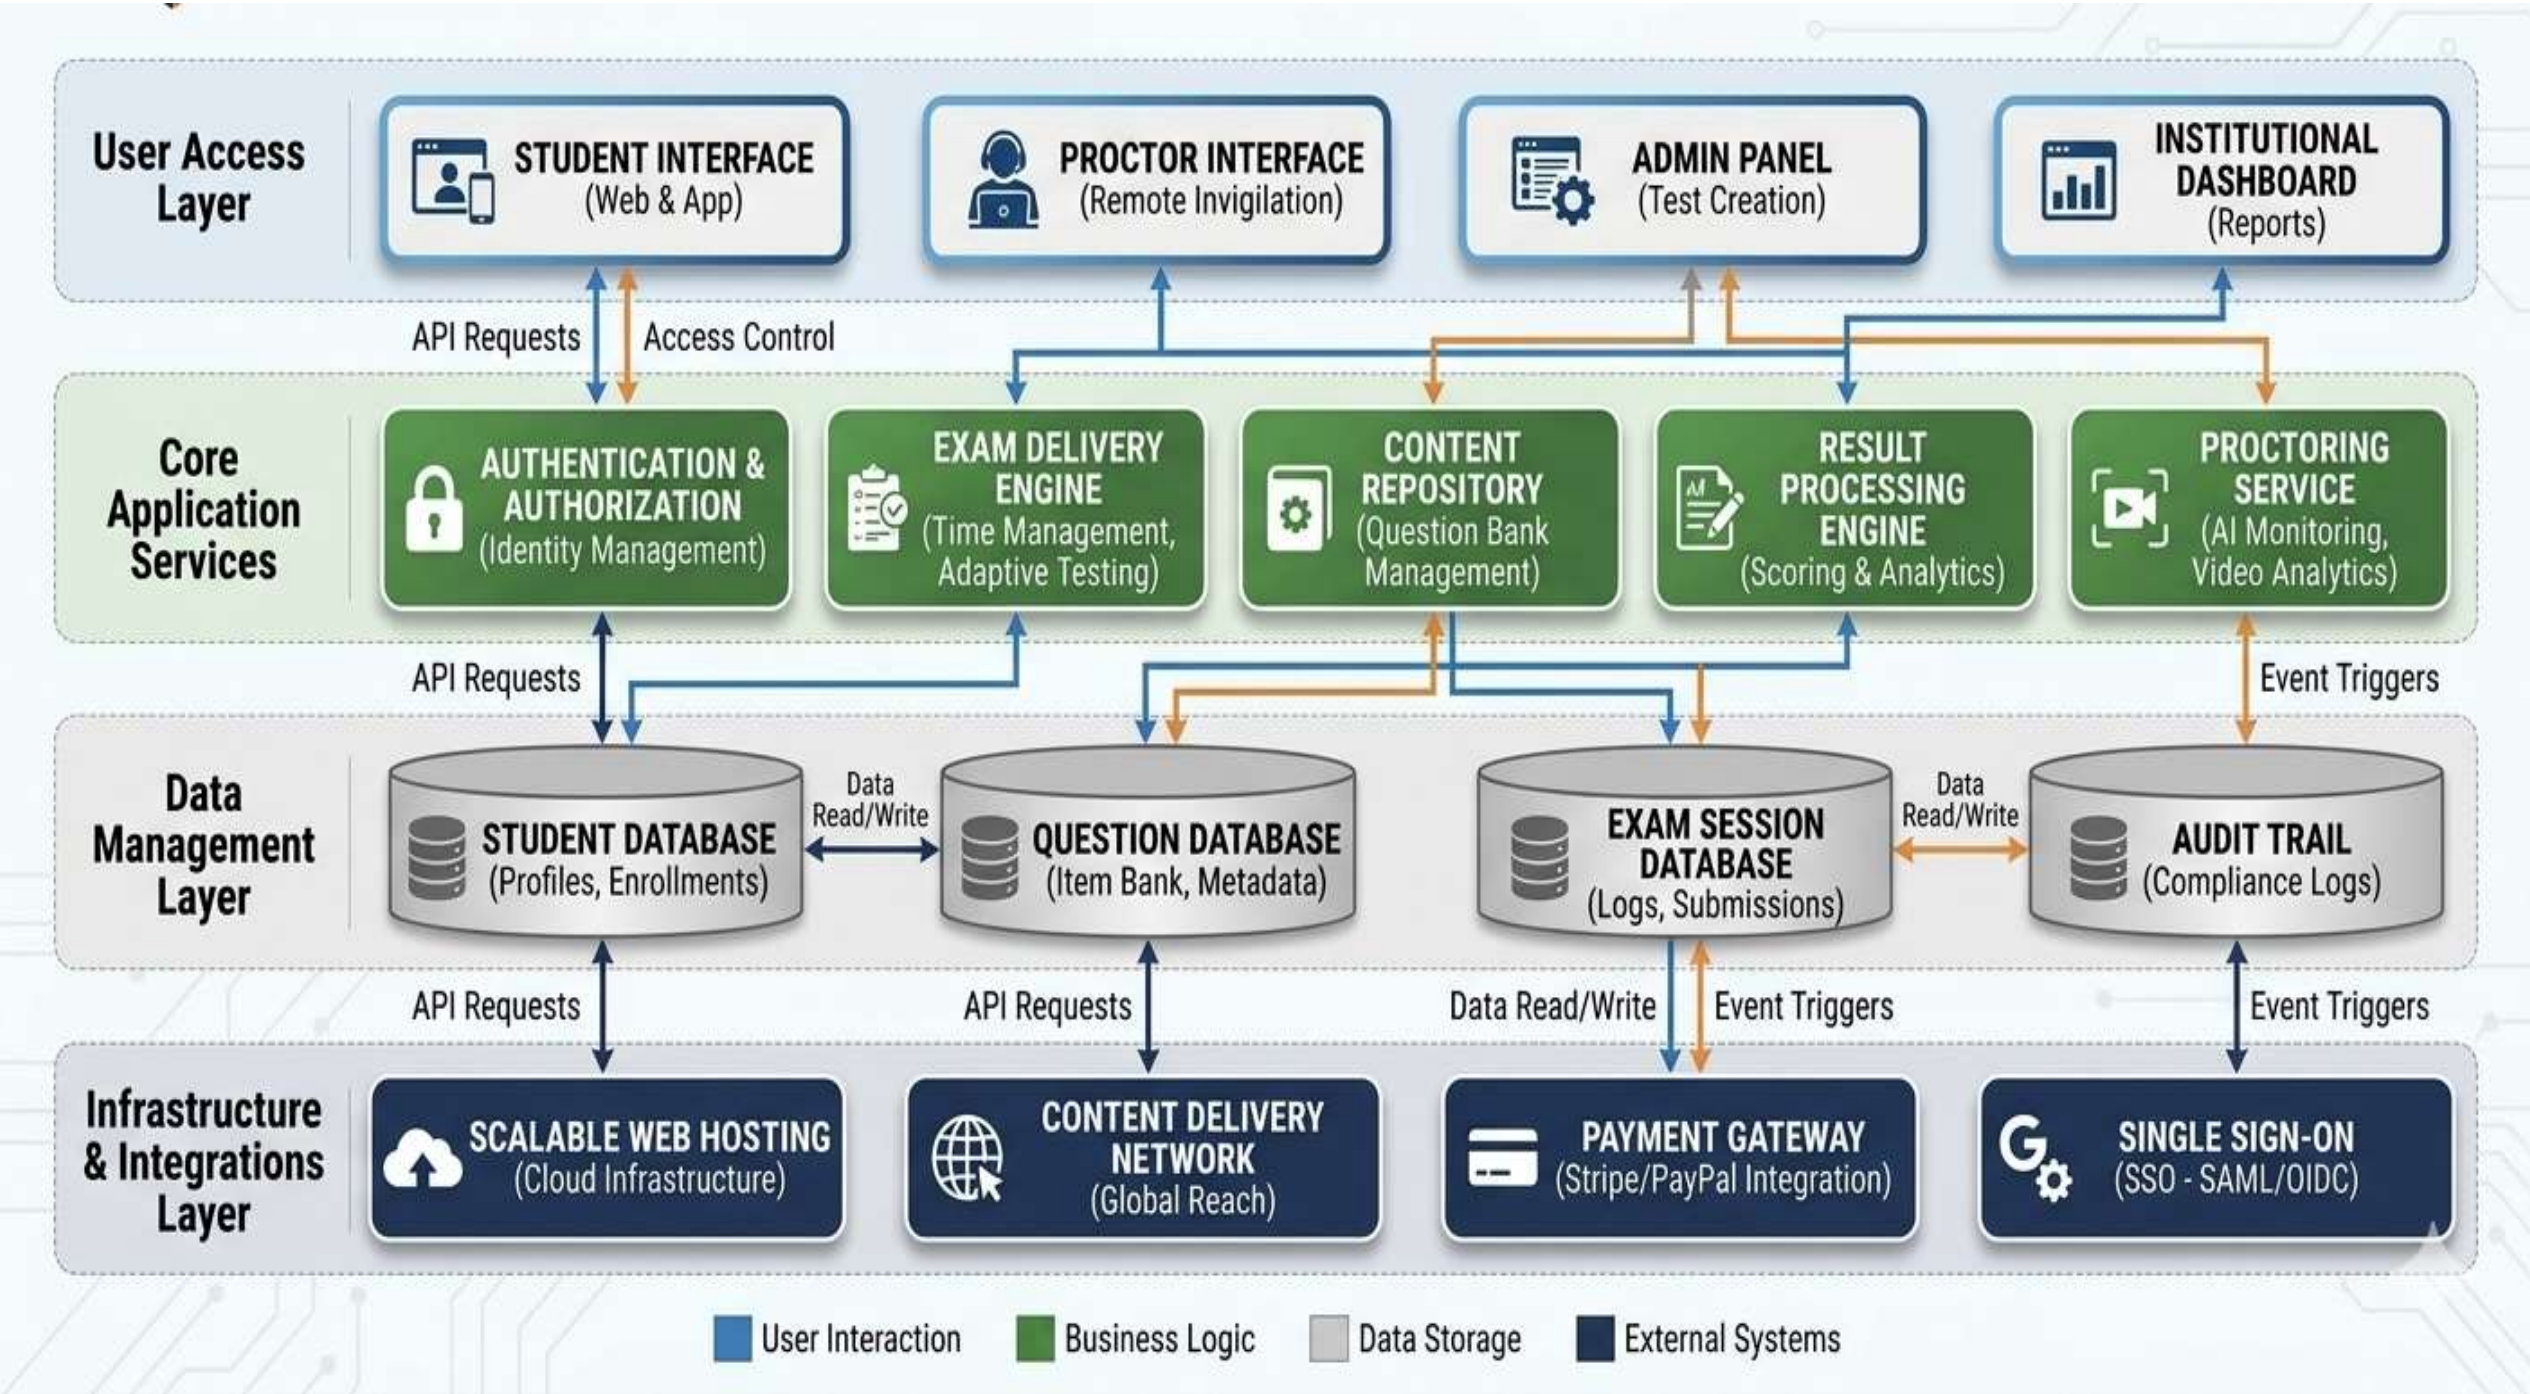

9

- The proposed system is a web-based Dynamic Online Examination & Result Processing System.
- It allows students to register, login, and access available exams online.
- Students can select a subject and attempt multiple-choice questions within a given time limit.
- The system automatically evaluates answers and calculates the score instantly.
- Exam results are stored in a database for future reference and analysis.
- Students can view their exam history and performance reports anytime.
- The system reduces manual work, human errors, and result processing time.
- It provides a fast, reliable, and efficient solution for managing online examinations.

PROPOSED SYSTEM ARCHITECTURE

WORKFLOW

The picture can't be displayed.

TECHNOLOGIES USED

The picture can't be displayed.

Frontend:

- HTML5
- CSS3

Backend:

- PHP (Core PHP)
- Session Management
- MySQL(Database Connectivity)

Database:

- MySQL
- phpMyAdmin

Tools:

- XAMPP (Apache + MySQL Server)
- Notepad
- Web Browser (Chrome)

Hardware / Software Requirements:

- **System:** Windows 10
- **RAM:** Minimum 4GB
- **Software:** XAMPP Server

MODULE DESCRIPTION

1

Module 1: User Authentication Module

2

- Handles student **registration and login**.
- Ensures **secure access** to the examination system.

3

Module 2: Exam Management Module

4

- Displays available exams for students.
- Allows students to **select and start the exam**.

5

Module 3: Examination Processing Module

6

- Shows questions and **records student answers**.
- Manages the **exam timer and question navigation**.

7

Module 4: Result Processing Module

8

- Automatically **evaluates answers**.
- Generates the **final score and percentage**.

9

Module 5: Result History Module

- Stores **previous exam attempts**.
- Allows students to **view their exam history and performance**.

IMPLEMENTATION SCREENSHOTS

The picture can't be displayed.

A screenshot of a web application's 'Student Portal' login page. The page has a blue header with the text 'Student Portal'. Below the header, there is a light blue box containing the 'Student Login' form. The form has two input fields: 'Email' and 'Password'. Below these fields are two buttons: a blue 'Login' button and a white 'Register' button with a blue border.

Login Page :

- Allows registered students to enter their email and password to access the system.
- The system verifies the credentials from the database for authentication.
- After successful login, the user is redirected to the exam dashboard to select exams.

Register Page :

- Enables new users to create an account by entering name, email, and password.
- The system stores the user details securely in the database
- After successful registration, the user can login and access the online examination system.

IMPLEMENTATION SCREENSHOTS

Exam Page :

- Displays multiple-choice questions with answer options for the selected exam.
- Includes a timer and **question** navigation to manage the exam within the given time.
- Records the student's selected answers and allows moving to the next question.

MySQL Basics Test

10 minutes - Answer all MCQs

Q1. Which SQL statement is used to retrieve data from a table?

☐ Option A
GET

☐ Option B
SELECT

☐ Option C
FETCH

☐ Option D
READ

Q2. Which join returns matching rows from both tables?

☐ Option A
LEFT JOIN

☐ Option B
RIGHT JOIN

☐ Option C
INNER JOIN

☐ Option D
FULL JOIN

Q3. Which is a primary key property?

☐ Option A
Can be NULL

☐ Option B
Must be unique

☐ Option C
Stores text only

☐ Option D
Allows duplicates

Q4. Which clause is used to filter records?

☐ Option A
WHERE

☐ Option B
ORDER BY

☐ Option C
GROUP BY

☐ Option D
LIMIT

IMPLEMENTATION SCREENSHOTS

The picture can't be displayed.

Exam Selection Page :

- Displays a list of available exams such as HTML, CSS, JavaScript, Java, Gen AI, and Machine Learning.
- Each exam card shows number of questions and time allocated for the exam.
- Students can select any exam to start the test and evaluate their knowledge.

Exam Results / History Page :

- Displays the student’s previous exam attempts and results.
- Shows details such as exam name, score, percentage, badge, and date.
- Helps students track their performance and review their exam history.

Student Portal						Exams	My Results	Logout	Home
My Exam History									Take Exam
ID	Exam	Score	%	Status	Submitted	Action			
3	MySQL Basics Test MySQL Basics	4 / 5	80.00%	PASS	2026-03-04 11:36:59	View			
2	PHP Basics Test PHP Basics	1 / 5	20.00%	FAIL	2026-03-04 11:35:49	View			
1	MySQL Basics Test MySQL Basics	1 / 5	20.00%	FAIL	2026-03-04 11:25:02	View			

ADVANTAGES & LIMITATIONS

1

Advantages:

- Conducts examinations online, reducing paper usage and manual work.
- Automatic result generation saves time and improves accuracy.
- Students can access exams and results easily through the web application.
- Stores exam history and performance records for future reference.
- Provides a fast and efficient examination process.

2

3

4

5

6

7

8

9

Limitations:

- Requires stable internet connectivity to take the exam.
- Limited to objective-type questions in the current implementation.
- System security needs improvement to prevent malpractice or cheating.
- Requires server and database maintenance for smooth operation.

Thank you
